

**welfareplus+® Rodent Enrichment Solutions**

# GNAWING ENRICHMENT PRODUCT

## Aspen Bricks

Delivers a natural solution to enrich the lives of rodents and rabbits.

### PRODUCT DESCRIPTION

**Aspen Bricks** enrichment offers a premium, all-natural solution designed to enrich the lives of your laboratory animals. Similar to our Aspen Ball enrichment, these products are created from fresh-cut, untreated Aspen wood, these durable bricks are specifically engineered to fulfill rodents' innate needs for gnawing, climbing, and exercise. Beyond providing an engaging object, Aspen Bricks help reduce unwanted aggressive and apathetic behaviors by encouraging natural instincts and activity. Sourced from sustainable, renewable resources, Aspen Balls are a responsible and effective addition to any animal enrichment program.

### PRODUCT FEATURES AND BENEFITS

- **Premium Grade Aspen Wood:** Made from high-quality, untreated aspen, ensuring a safe and natural enrichment option for your animals.
- **Highly Durable:** Constructed to withstand natural chewing and gnawing behaviors, providing long-lasting enrichment.
- **Promotes Natural Behaviors:** The spherical shape and natural material encourage gnawing, climbing, and physical activity, vital for rodent well-being. Helps to maintain oral health.
- **Minimizes Animal Stress Levels:** By providing an outlet for natural instincts and promoting exercise, Aspen Bricks aid in reducing stress and associated aggressive or apathetic behaviors.
- **Suitable for Re-use Following Cage Change:** Designed for practicality, these bricks can be sanitized and reused, contributing to cost-effectiveness and sustainability in your facility.
- **Suitable for mouse, rat, hamsters, cotton rats and rabbit.**

### PACKAGING

Product is autoclavable. Certificates of analysis are available.
