

welfareplus® Rodent Enrichment Solutions

SHELTER ENRICHMENT PRODUCT

Smart Home

Provide comfort and enrichment for your rodents with the new generation of paper pulp homes.

PRODUCT DESCRIPTION

Smart Homes are an engineered and disposable enrichment solution that is sustainable, ethical and economical. Made from 100% virgin paper pulp, they are fully biodegradable, providing a secure and stimulating environment.

PRODUCT FEATURES AND BENEFITS

- **Cost-effective:** Offers a cost-effective solution for large-scale animal housing and enrichment needs.
- **Versatile Design:** Can be easily split into two smaller homes, offering flexibility for different study requirements or animal numbers.
- **Ideal for Specific Studies:** Excellent for toxicology or short-term studies where frequent changes or disposability are beneficial.
- **GLP compliant** with full traceability
- **Superior Animal Safety:** Molded soft edges eliminate sharp points, ensuring your animals are safe and comfortable.
- **Enhanced Visibility:** Dual apertures encourage activity while also providing clear visibility for efficient cage and welfare checks.
- **Suitable for small rodents**
