

## iso-PADS™

### Unique environmental enrichment

iso-PADS™ represent the next generation of bedding materials. iso-PADS are flat, compressed, 6" x 10" rectangular pads of cotton fiber material that can be dropped conveniently into standard shoebox rodent cages. iso-PADS are meant to be used as a contact bedding. Rodents enthusiastically shred the pads into a soft, fluffy consistency which offers unsurpassed nesting and enrichment.

## PRODUCT FEATURES AND BENEFITS

### High tech product

- Eliminates variables associated with recycled or synthetic bedding products
- Produced from FDA-approved, cotton-based cellulosic fibers that are hypoallergenic
- Perfect companion for microisolation units or standard "shoebox" cages

### iso-BLOX™: The ideal add-in

As an alternative, the smaller iso-BLOX are made of the same material and can be used conveniently as an adjunct environmental enrichment to existing natural beddings. Call us for information on this companion product.

### Controlled manufacturing

- Sized and packaged in a plant that is dedicated to the production of laboratory animal bedding products, in which maximum levels of quality control and vermin control are employed
- Strictly defined and screened at least annually for potential contaminants

### Sterilization options

- iso-PADS can be autoclaved
- Irradiated iso-PADS eliminate the need for steam autoclaving

### High absorbency

- Absorbs more than 400% its weight in water
- Enhanced evaporation of liquids
- Controls odors better and lasts longer than traditional bedding materials
- Biodegradable and environmentally friendly
- Reduced waste volume

### Color and consistency

- Improved observation

### Availability

6105 iso-PADS 6" x 10" packaged 500 pads per case. There are 100 sheets in a heat-sealed stretch-wrap pack, 5 packs per case.
