ABOUT

Adam Aulbach joined Inotiv in 2021, bringing almost 2 decades of safety assessment pathology perspective to the team. Dr. Aulbach's extensive experience in clinical pathology, and his unique expertise in the area of experimental biomarkers allows us to further develop our comprehensive suite of traditional and innovative services.

He has held a variety of leadership roles, including scientific director of clinical pathology at MPI Research, adjunct assistant professorship at Michigan State University, and Head of Biomarker Center of Excellence at Charles River Laboratories.

Dr. Aulbach is widely published in the field of toxicologic clinical pathology, with numerous book chapters and peer reviewed publications. He has presented widely in the field and brings a strong tradition of mentoring and cross-disciplinary collaboration further enhancing the abilities of the rest of our pathology and scientific teams.

Dr. Aulbach completed his veterinary training at University of Missouri-Columbia and his residency training at Michigan State University, in a combined veterinary clinical pathology and toxicologic pathology residency. He is a diplomate of the American Board of Toxicology (DABT).
