

Molly Liepnieks

DVM, DACVP

Pathologist

molly.liepnieks@inotiv.com

ABOUT

Dr. Molly Liepnieks joined Inotiv as a veterinary anatomic pathologist in 2022. She has special interest in non-human primate pathology, neuropathology, and medical device evaluation.

Prior to joining Inotiv, she had experience in GLP and non-GLP toxicologic pathology at Charles River Laboratories as an anatomic pathologist. Additionally, she has over a decade of experience in laboratory animal care, animal research, post-approval monitoring, and protocol management as a laboratory manager and research associate.

Dr. Liepnieks received her DVM from the University of California-Davis, where she also completed her pathology residency, specializing in comparative and laboratory animal pathology. During the course of her residency, she spent 9 months at the California National Primate Research Center and 9 months at the UC Davis Comparative Pathology Laboratory as a trainee pathologist and received extensive exposure to and training in pathologic evaluation of models of disease and research models.

AREAS OF EXPERTISE

- Non-human primates
- Stem cell therapies,
- Gene therapies (AAV, oligonucleotides),
- Comparative diagnostic pathology,
- Neuropathology

MY JAM

- Baking
- Crafting
- Yoga
- Reading
