ABOUT

Dr. Nick Vetter joined Inotiv in 2022 as a veterinary anatomic pathologist. Dr. Vetter has a passion for exploring new areas within the field of toxicologic pathology and is developing special interest in long-acting injectables, dermatopathology, cardiovascular pathology, and musculoskeletal pathology.

Dr. Vetter is dedicated to career development and student outreach opportunities through leadership and participation in the STP Career Development and Student Interactions Subcommittees, respectively, and as a committee liaison with the STP Diversity, Inclusion, and Belonging Committee. His additional projects include developing poster presentations with students/residents, collaborating on special interest group manuscripts, and internal project support within the company. He is looking forward to further building his toxicologic pathology experience and exploring industry through continued opportunities at Inotiv.

Dr. Vetter received his DVM from Michigan State University and completed his residency in anatomic pathology at Cornell University.
