## ABOUT

Sarah Coe is an anatomic pathologist with a special interest in reproductive pathology. She is currently with the Inotiv pathology group in Kalamazoo, Michigan. She also has a special interest in training, serving as the residency and externship coordinator for Inotiv and Co-Chair of the Student Interactions Subcommittee of the Society of Toxicologic Pathology. She attended Michigan State University for her undergraduate degree in zoology with a concentration in developmental biology, master's of public health, and doctorate of veterinary medicine.

She completed her residency in anatomic and toxicologic pathology at Michigan State and Charles River Laboratories in Mattawan, Michigan and has worked in contract research organizations since then. Sarah has co-authored textbook chapters focused on toxicologic pathology of the reproductive system and pathology of the male reproductive system of swine, authored multiple pathology manuscripts, and presented multiple webinars focused on male reproductive pathology.
